

**“Winning the war
against Indian
mynas” with**

Myna Magnet

Myna Magnet is a scientifically designed Indian myna trap to help you “win the war against Indian mynas”.

**For details call 1300 665 657
or visit www.MynaMagnet.com.au**

Myna Magnet offers you the opportunity to help reduce or eliminate this environmentally destructive pest.

With Myna Magnet you can help our environment by humanely eradicating the Indian myna (*Acridotheres tristis*). These collapsible traps are the result of years of university research and development. They are highly effective and species selective.

The Myna Magnet is suitable for use in domestic, commercial, council and rural situations.

Our clients report a speedy return of native bird species once the Indian mynas have been eliminated.

But don't take our word for it – here is what our clients say:

Vern from Townsville:

“captured 93 mynas in about 8-10 weeks”.

John from North Rocks:

“I have exterminated some 120 of these ferals from my backyard”.

David from Maitland: “We have lost count of how many, but it has made a substantial dent on the local mynas”.
